MUHAMMAD ABDULLAH

pakabdullah225@gmail.com AbdullahAssi Muhammad Abdullah Abdullah-Assi +92318-8225225

As a versatile Full Stack developer, my primary focus lies in Front-end development/UI/UX and APIs. I bring industry experience in building robust websites and web applications with a specialty in React JS, Next JS and JavaScript. My role entails crafting and styling front-end components that align with mockups and user stories and integrating these components with APIs.

SKILLS

- **Languages:** JavaScript, PHP, Java
- **Frameworks:** Reactjs,Nodejs, Laravel, Nextjs, React Router,Tailwind,
- **Libraries:** Context API,REST API, Recoil, GSAP, Framer Motion
- **Tools:** Git,Github, Postman, C-Panel, Xamp , Apache, Figma
- **Soft Skills:** Poblem Solving , TeamWork, Communication , Adaptability

WORK EXPERIENCE

Software Engineer | Qualven

Officium (Office Automation System)

- Contributed to the FrontEnd development of the Officium WebApplication using React.
- Focused on optimizing performance by refining component structures, implementing lazy loading, and reducing load times.
- Enhanced the user interface with a clean, responsive design, ensuring a seamless experience across multiple devices.
- Collaborated closely with designers and backend teams to align functionality with UI/UX goals.
- Contributed to an intuitive, user-friendly platform by focusing on UI/UX enhancements.

Pakcr Donor Portal (US Based Donation Management System)

- Collaborated on the development of the Pakcr Donor Portal to enhance user experience and donor engagement.
- Streamlined the donation process by optimizing form flows and integrating user-friendly navigation.
- Developed interactive elements to simplify donor interactions, improving retention and satisfaction.
- Worked with the development team to ensure smooth data handling, security measures, and scalable solutions.
- Contributed to the creation of a more efficient and engaging donor management experience.

Pakcr Website

- Played an integral role in the successful revamping of the Pakcr website, focusing on both design and functionality.
- Assisted in redesigning the platform to ensure consistency in branding, layout, and design elements across all pages.
- Enhanced the user experience by implementing modern UI/UX best practices, creating a more intuitive and visually appealing interface.

- Ensured a seamless integration of new design elements with existing functionalities, improving overall site usability and navigation.
- Collaborated with cross-functional teams to resolve compatibility issues, optimizing both the visual appeal and functional performance of the platform.

Technical Intern | Qualven

Schola Promotional Website

- Developed a promotional website for Schola to market a School Management System.
- Focused on showcasing system features with an emphasis on user engagement and functionality.
- Designed the website to enhance the marketing strategy, driving interest in the platform.

Qualven Portfolio Website Migration

- Contributed to the migration of Qualven's Portfolio Website from WordPress to PHP.
- Ensured a seamless transition with no downtime, improving site performance and scalability.
- Focused on optimizing the UI to enhance functionality and user experience post-migration.

PROJECTS

GoGo-Pizza Web Application

- Developed a pizza ordering web application with REST API integration.
- Implemented features such as cart management and user authentication to streamline the ordering process.
- Focused on providing a smooth, user-friendly experience for both customers and admin.

Typest (Typing Speed Test Application)

- Created Typest, a typing speed test application inspired by MonkeyType.
- Designed to help users improve typing speed and accuracy through engaging challenges.
- Implemented performance tracking features to monitor progress.

HighVision Website

- Developed a website for HighVision, prioritizing intuitive design and user experience.
- Ensured smooth navigation and a clean interface to enhance user engagement.

Cafe Management System (Desktop Application)

- Developed a desktop application using Java, JavaFX, and SQL to manage cafe operations.
- Integrated features for inventory tracking, order management, and sales reports.
- Streamlined processes to improve operational efficiency for cafe owners.

WhiskerBites (Food Ordering Mobile App)

- Developed WhiskerBites, a food ordering app, using Java, SQLite, and XML.
- Implemented functionality for browsing menus, placing orders, and tracking deliveries.
- Focused on creating a user-friendly interface for a seamless food ordering experience.

EDUCATION

National University of Technology **Islamabad.Pakistan**

Bachlors of Artificial Intelligence

Punjab Group of colleges **Dunyapur, Punjab**

Intermediate in Computer Science(ICS)

CERTIFICATES

- Meta FrontEnd Developer From Coursera
- Freelancing From DigiSkill
- Meta React Native From Coursera
