Phone: +92 3038021430 | Address: H-13 Islamabad

SUMMARY

Software Engineer with 6+ years of experience designing and building scalable web applications and enterprise-grade ERPs. Proficient in **Node.js, Express.js, Nest.js, Laravel (PHP), and Odoo ERP**, with strong expertise in **RESTful API development, PostgreSQL/MySQL, MongoDB, authentication, and microservices architecture**. Skilled in integrating payment systems, optimizing performance, and deploying applications in Linux environments. Adept at collaborating with cross-functional teams and delivering tailored solutions aligned with client needs.

WORK EXPERIENCE

Senior Software Engineer – Odoo Team Lead

CyMax Technologies Islamabad | Nov 2024 – Present

- Initially contributed to PHP/Laravel projects, then transitioned to developing customized ERP solutions in Odoo, delivering complete modules including Accounting, HR, Project, CRM, Inventory, Sales, and Purchase.
- Leading the Odoo ERP development team, mentoring junior engineers, and managing end-to-end delivery of customized ERP modules.
- Built POCs and full-scale ERP systems tailored to client needs by extending Odoo core functionalities.
- Handled deployment and server management on Linux-based environments, including configuration, updates, and live deployments.
- Engaged in client meetings, technical consultation, and demonstrations, ensuring smooth communication and collaboration throughout project lifecycles.

Key Technologies: Odoo, Python, Laravel, NodeJS, PostgreSQL, MySQL, Linux, APIs, ERP

Software Engineer - Backend Developer

Qualven Pvt Ltd Islamabad | Mar 2018 – Oct 2024

- Developed and maintained **backend applications using Node.js, NestJS, Express.js, and Laravel (PHP)**.
- Designed and implemented **RESTful APIs, microservices, and authentication mechanisms (JWT, OAuth)** for scalable platforms.
- Built and optimized **PostgreSQL/MySQL schemas, queries, and aggregations** to ensure high performance.
    - Integrated third-party APIs and services, including **Stripe, PayPal, ACH, and FCM.**
- Applied **design patterns (MVC, OOP, Microservices)** to build maintainable and scalable architectures.
- Contributed to **CI/CD pipelines, Git workflows, and server-side deployments**, improving delivery efficiency.
- Mentored junior developers, collaborated closely with clients, and managed tasks via JIRA and Trello to deliver high-quality solutions.

Key Technologies: Node.js, Express.js, Laravel, MongoDB, PostgreSQL, MySQL, Redis, Docker, Git

SKILLS

Languages/Framework:	Node.js, Express.js, NestJS, Laravel (PHP), Odoo (Python)
Databases & ORMs:	PostgreSQL, MongoDB, MySQL, MariaDB, Firebase
Architecture:	REST APIs, Microservices, SOA, MVC, OOP, CI/CD
Libraries:	Image Intervention, Eloquent ORM, jQuery, Bootstrap, Stripe API, PHPMailer, Guzzle, DomPdf, Chart.js, Livewire, Carbon, Faker, DataTables, TypeORM
Tools:	Git/Github, XAMPP, MYSQL Workbench, pgAdmin, PyCharm, Postman, Docker, WinSCP, Jira, Trello
Soft Skills:	Time Management, Client Interaction, Problem Solving, Team Collaboration, Communication, Adaptability

EDUCATION

BS Computer Science

- Hazara University Mansehra. • **CGPA**: 3.74 / 4.00

PROJECTS

Odoo ERP Implementation for CyMax (In-house)

- Contributed to the in-house implementation of a customized Odoo ERP system for CyMax Technologies.
- Helped build and customize modules for Accounting, HR, Project Management, CRM, Inventory, Sales, and Purchase to match internal workflows.
- Supported deployment and configuration on Linux-based servers, ensuring stable and secure production rollout.
- Participated in requirement discussions and sprint planning with internal stakeholders.

Custom ERP Solution for ConnecTech

- Collaborated as a senior resource in the development of a complete Odoo-based ERP tailored for ConnecTech's operational needs.
- Involved in creating and customizing modules like Accounting, CRM, HR, Project, Inventory, Sales, and Procurement with client-specific workflows.
- Participated in regular client meetings for requirement gathering, demonstrations, and feedback incorporation.
- Assisted in deployment, testing, and post-implementation support on Linux-based environments.

Jobify – Job Portal

- Enhanced the core **job portal platform** by optimizing backend services and implementing new features to improve hiring workflows.
- Developed and extended **RESTful APIs** to support advanced job search, application tracking, and candidate profile management.
- Integrated **email notifications and reference check automation**, improving communication between applicants and employers.

USA-based Donation Management System | (https://donorportal.pakcr.org)

- Assisted in developing the PakCR Donor Portal, a comprehensive platform for managing charitable contributions to support orphans through a USA-based organization.
- Developed and maintained backend services using **microservices architecture** to ensure scalability and modular design.
- Designed and exposed **RESTful APIs** consumed by the mobile app and website, enabling seamless cross-platform integration.
- Implemented **secure authentication and authorization** and role-based access control for data protection.
- Contributed to features providing real-time insights into philanthropic impact, including tracking the progress of sponsored children with detailed profiles.
- Optimized database operations with **PostgreSQL**, including schema design, indexing, and query optimization for high-performance data handling.
- Enhanced the portal with graphical representations of data, donation trackers, and orphan tracking for donors to improve transparency and user experience.
- Applied **caching strategies** to enhance API response times and reduce server load.

PakCR's Website | (https://pakcr.org)

- Integrated multiple **payment gateways** including **Stripe, ACH, Credit/Debit Cards, and Bank transfers**, ensuring secure and reliable transactions.
- Developed **backend payment logic**, enabling smooth transaction processing and financial operations.
- Implemented **orphan listing and management features**, ensuring accurate representation and intuitive navigation for donors.
- Applied **security best practices** (Authentication, input validation, HTTPS) to safeguard sensitive donor and payment data.

Ecommerce Application for DT Dobie Kenya

- Built a scalable **e-commerce backend using Node.js for** vehicle spare parts.
- Contributed to **product catalog, order management, promotions, and online payments**.
- Integrated **campaign management, reporting, and third-party services**.

Engineers Management System for NTC | (http://registration-ntc.hec.gov.pk)

- Built backend modules for **engineer registration, accreditation, and financial transactions**.
- Integrated with **Askari Bank APIs** for secure online payments.
- Streamlined accreditation workflows for **200+ Higher Education Institutions (HEIs)**.

MDM – Gym Management System

- Designed and implemented **backend systems** with CRUD operations for managing memberships, schedules, trainers, and classes.
- Developed **RESTful APIs** to power the mobile application, enabling real-time class bookings, attendance tracking, and membership status.
- Built **admin dashboards** to manage gym operations, trainers, and payment histories.
- Applied **role-based access control (RBAC)** to separate permissions between admins, trainers, and members.

GoGo-Pizza Web Application

- Developed a **pizza ordering web application** focusing on robust backend services.
- Built **REST APIs** for menu browsing, order management, and real-time cart updates.
- Implemented **user authentication** with JWT to secure customer accounts and order histories.
- Enhanced admin panel for managing products, categories, and promotional offers.

POSITIONS AND RESPONSIBILITIES

PRESIDENT - SOCIETY OF COMPUTER TECHNOLOGY, GPGC MANSEHRA

Organized Coding and gaming competitions, technical workshops, exhibitions, etc
