PROFESSIONAL SUMMARY

Software Engineer with strong experience in building **scalable backend systems, APIs, and full-stack web applications**. Specialized in **Node.js, TypeScript, and modern JavaScript frameworks**, with hands-on experience delivering **AI-powered systems, enterprise workflows, and secure role-based platforms**. Actively expanding expertise in **DevOps, cloud-native deployments, and AI system integration**, with a strong focus on performance, reliability, and real-world business impact.

WORK EXPERIENCE

Software Engineer - CyMax Technologies (CEMTECH)

Nov 2024 – Present

- Designed, developed, and maintained scalable backend systems and APIs for AI-driven and business applications
- Integrated AI-powered solutions into production systems with a focus on accuracy, security, and performance
- Built and optimized data pipelines, admin panels, and automation workflows for enterprise use cases

Software Engineer - Qualven (NSTP)

Aug 2021 – Oct 2023

- Developed full-stack web applications using React, Node.js, and RESTful APIs
- Built enterprise-grade systems with secure authentication and **role-based access control (RBAC)**
- Delivered end-to-end business workflows including reporting, exports, and admin dashboards

KEY PROJECTS

Smart Assist - RAG-Based AI Website Chatbot

- Built a Retrieval-Augmented Generation (RAG) chatbot for accurate website-specific question answering
- Implemented ingestion pipelines for content extraction, embeddings, and semantic indexing
- Reduced LLM hallucinations by grounding responses in verified business data

EBM Orientation -Enterprise Document Q&A Chatbot

- Developed a document-based Q&A system with an admin-controlled knowledge base
- Enabled document uploads, embedding retraining, and semantic search
- Delivered precise, relevance-ranked answers for enterprise users

AI-Powered Business Advisory System

- Integrated AI workflows with backend services to provide automated business insights
- Improved engagement through optimized UI/UX and landing pages
- Supported decision-making with AI-assisted recommendations

AI Automation & Lead Generation

- Automated lead capture from AI chatbots and website forms
- Integrated AI interactions with CRM systems for real-time tracking
- Improved conversion efficiency by removing manual data handling

CV–JD Intelligent Recruitment System

- Built an AI-driven platform to evaluate CVs against job descriptions
- Implemented hybrid logic combining rule-based scoring with LLM evaluation
- Enabled automated candidate ranking and recruiter insights

QualTax - FBR & Invoice Management System

- Developed an end-to-end tax and invoice management platform compliant with FBR workflows
- Implemented secure authentication and role-based access control (RBAC)
- Enabled reporting, exports, and audit-ready business processes

Job Portal & Recruitment Management System

- Built a recruitment platform with job posting and application tracking

- Implemented reporting dashboards and export functionality
- Supported real-time status tracking for HR teams

GoGo Pizza Web Application

- Developed a food ordering platform with cart, authentication, and admin workflows
- Integrated REST APIs for order and user management
- Delivered a smooth user and admin experience

Budtender - eCommerce Platform

- Built a complete eCommerce solution with product, order, and customer management
- Developed secure admin dashboards for business operations
- Supported checkout workflows and automated notifications

MDM - Gym Management System

- Developed membership and scheduling management features
- Built backend APIs for mobile and web access
- Integrated Stripe for secure subscription payments

Caring Friend Direct

- Developed a service booking and staff management system
- Implemented scheduling, attendance, and reporting features
- Enabled admin oversight through structured dashboards

Pakcr Donor Portal

- Built a secure donation platform for a US-based NGO
- Improved donor engagement and data handling
- Ensured scalability and application security

TECHNICAL SKILLS

Backend & APIs: Node.js, TypeScript, NestJS, Express.js, REST APIs, Laravel, Fast APIs, Swagger/OpenAPI, GraphQL (basic)
Databases & ORMs: PostgreSQL, MySQL, MongoDB, Prisma, TypeORM, Mongoose
Authentication & Security: JWT, OAuth fundamentals, Role-Based Access Control (RBAC), Firebase Auth
AI & System Integration: RAG pipelines, embeddings, semantic search, LLM API integration
DevOps & Cloud: Docker, CI/CD fundamentals, environment management, VPS & cloud deployments (AWS/Azure basics)

Frontend: React.js, Next.js, Tailwind CSS, ShadCN UI, Context API, Redux
Tools: Git, GitHub, Postman, Figma

EDUCATION

Bachelor of Artificial Intelligence
National University of Technology (NUTECH), Islamabad

Intermediate in Computer Science (ICS)
Punjab Group of Colleges

CERTIFICATIONS

- **Meta Full-Stack Software Engineer - Coursera**
